

# Sacrifice Nothing

Kohler Power Systems brings truckers a better way to keep their comforts in the face of growing anti-idling laws and at the same time provides fuel savings. Introducing the KOHLER® 7APU diesel auxiliary power unit (7APU), one of the most powerful and economical APUs on the road. The liquid-cooled, self-contained unit is installed with no intrusion into the truck's critical systems. The KOHLER 7APU supplies both AC and DC power: AC power to run heat, air conditioning, microwave, block heater or anything else that a driver would need, and DC power to charge the truck's batteries – all without idling. So drivers keep their comforts while saving on fuel, engine wear and maintenance.

**From independent owners to fleet operators,  
a KOHLER APU sees to it you sacrifice nothing.**

**KOHLER®**

# The KOHLER® APU Makes Anti-Idling a Nonissue

## KOHLER 7APU FEATURES

- **Powerful** – With a 6.5 kW output, enough power is provided to run heat, air conditioning, TV, microwave, block heater or any other comforts a driver may want.
- **Fuel-efficient** – The 7APU requires less than one-third gallon of diesel fuel per hour under typical load.
- **Simplified maintenance, solid performance** – The liquid-cooled unit uses a belt-drive alternator, which does not require intrusion into the truck's system. When synthetic oil is used, the KOHLER 7APU requires an oil change only every 500 hours.
- **Battery charging** – The 7APU provides 45 amps of DC power to keep the truck's battery charged at all times.
- **Compact** – The 7APU uses only 25 inches of frame rail space.
- **Quiet operation** – A custom sound-attenuated enclosure allows the KOHLER 7APU to quietly operate at 71 dBA.
- **Control** – Complete in-cab start/stop and heating/cooling adjustments with diagnostics.
- **Warranty** – Limited two-year.

The KOHLER 7APU provides 6.5 kW of AC power and 45 amps of battery charging, keeping drivers comfortable while still providing superior fuel savings.

HVAC self-contained system

HVAC remote system

**7APU In-Cab Climate Control** – For additional flexibility, the KOHLER 7APU offers two options in compact under-bunk heating and cooling. Choose from the space-saving remote unit or the easy-to-install, self-contained unit. Both offer 14,000 Btu/hour cooling and 2.5 kW heating.
